

Lab 2: Mobile-First Responsive Profile Showcase (Graded)

Weight: 3.75%	Released: Week 2 (Hour 3 Studio)
Due Date: One day prior to Week 3 class @ 11:59 PM EDT	Submission: Quercus (GitHub Repo & Pages URL)

Overview

In this lab, you will apply the Mobile-First design paradigm and CSS Flexbox to build a responsive, single-page profile or project showcase card layout. You will utilize flex-basis percentage sizing alongside justify-content alignment properties to ensure your layout adapts cleanly across viewports without horizontal scrolling.

Target Layout & Wireframe Specifications

```

1. Mobile View (< 768px): Single Vertical Column
+-----+
|           [LOGO]           |
| [Home]  [Projects] [Contact] | <-- Nav links stack vertically
+-----+
| [BIO HERO SECTION]         | <-- Full width block (flex-basis: 100%)
+-----+
| [PROJECT CARD 1]           |
| [PROJECT CARD 2]           | <-- Staked vertical cards (flex-basis: 100%)
| [PROJECT CARD 3]           |
+-----+
|           <footer>...</footer>           |
+-----+

2. Desktop View (>= 768px): Multi-Column Flex Grid
+-----+
| [LOGO]           [Home]  [Projects]  [Contact] | <-- space-between row
+-----+
| [BIO HERO SECTION - FULL WIDTH INTRO BAR]         |
+-----+
| +-----+ +-----+ +-----+ | <-- Flex row aligned using
| | Card 1   | | Card 2   | | Card 3   | | flex-basis: 30% and
| | (basis: 30%) | | (basis: 30%) | | (basis: 30%) | | justify-content
| +-----+ +-----+ +-----+ |
+-----+
|           <footer>...</footer>           |
+-----+

```

Technical Requirements

Repository & Directory Setup

- ~~GitHub Repo. Create a new repository named lab2 (or click 'Use this template' if using the course template).~~

- ~~Folder Structure: Ensure index.html is at the root level, with a css/ folder containing style.css.~~
- File Linking: Link your stylesheet properly inside <head> using <link rel="stylesheet" href="css/style.css">.

HTML Structure (index.html)

- Viewport Meta Tag: Include <meta name="viewport" content="width=device-width, initial-scale=1.0"> inside <head>.
- Semantic Elements: Structure your layout using <header>, <main>, <section>, <article>, and <footer>.
- Content Sections: Include a header with navigation, a bio/hero section (<section class="bio-hero">), and a card container (<section class="card-grid">) housing 3 cards (<article class="card">).

CSS Styling & Flexbox Layout (css/style.css)

- CSS Reset: Clear browser default spacing using * { margin: 0; padding: 0; box-sizing: border-box; }.
- Mobile-First Base Styles (< 768px): Apply display: flex; flex-direction: column; on layout containers so content stacks vertically by default with flex-basis: 100% on cards.
- Responsive Breakpoint (>= 768px): Add @media (min-width: 768px) { ... }.
- Desktop Flex Alignment: Switch navigation and .card-grid to flex-direction: row;. Apply flex-basis: 30%; to .card elements and use justify-content: space-between; on .card-grid to align items and distribute free space.
- Interactive Styling: Add a subtle hover interaction on .card components (e.g., elevation box-shadow or border transition).

Submission Checklist

- [] Universal selector clears default margin/padding and sets box-sizing: border-box.
- [] Stylesheet is located inside css/style.css and correctly linked in HTML.
- [] HTML uses semantic tags including a Bio/Hero section and 3 Card articles.
- [] Mobile layout stacks vertically at full width without horizontal scrollbars.
- [] Desktop view (>= 768px) rearranges cards side-by-side using flex-basis: 30% and justify-content.
- [] Cards feature a working hover state interaction.
- [] Repository link and live GitHub Pages URL are submitted on Quercus.

Grading Rubric (10 Points Total)

Criteria	Description	Points
Directory & Setup	Correct css/style.css folder structure, semantic HTML5 tags, and Viewport Meta Tag.	2 pts
Mobile-First Layout	Includes universal reset; targets mobile viewports with clean vertical Flexbox stacking.	3 pts
Desktop Media Query	@media (min-width: 768px) switches grid to horizontal layout using flex-basis: 30% and justify-content.	3 pts
GitHub Deployment	Code committed to GitHub repository and successfully deployed via GitHub Pages.	2 pts
